Career Profile

Cloud Engineer with 6+ years of experience in infrastructure automation, cloud-native architecture, and system administration. Proven expertise in optimizing system performance, ensuring high availability, and driving customer satisfaction through strategic cloud technology implementations. Proficient in AWS, Kubernetes, and Terraform with hands-on delivery of scalable, secure infrastructure solutions. Proven track record in managing large-scale projects, providing 24/7 support, and collaborating with cross-functional teams to deliver robust, scalable, and secure cloud solutions. Committed to professional growth and delivering exceptional results in fast-paced environments.

Certifications

- AWS Certified Solutions Architect - Associate (2024)
- Certified Kubernetes Administrator (CKA) (2024)
- Red Hat Certified System Administrator (RHCSA) (2023)
- VMware Certified Professional - Network Virtualization & Data Center Virtualization (2018)
- Microsoft Azure Administrator (2019) | Palo Alto Accredited Configuration Engineer (2019)
- Cisco Certified Network Associate (CCNA) (2018)

Technical Skills

- Cloud Technologies: AWS (EC2, S3, RDS, VPC, IAM, EKS, ECS, Lambda), OpenStack
- Container & Orchestration: Kubernetes, Docker, Helm
- Infrastructure as Code (IaC) & Automation: Terraform, CloudFormation, Jenkins, Git, CI/CD Pipelines
- System Administration: Linux (RHEL, CentOS), Windows Server, VMware (ESXi, vCenter)
- Monitoring & Security: Prometheus, Grafana, Zabbix, Security Hardening
- Networking: DNS, AD, DHCP, TCP/IP, OSI Layers, Palo Alto Firewall

Cloud & DevOps Project Highlights

- Cloud Resume Portfolio – CI/CD & Monitoring Enabled – Serverless
  - Hosted static resume website on AWS (S3, CloudFront, Route 53) with CI/CD via GitHub Actions.
  - Managed infrastructure using Terraform; integrated custom metrics and alerting using CloudWatch.
- EKS 2048 Game Deployment
  - Containerized and deployed the 2048 web game on EKS using a LoadBalancer service.
  - Managed infrastructure using Terraform; Automated deployment using Helm and use EKS Fargate for serverless architecture.
- BookInfo Microservices with ECS + Harbor + TLS
  - Deployed Istio-based BookInfo microservices app on VM using private container images from Harbor & ECS.
  - Configured namespace separation, RBAC, and integrated with Kubernetes.

PROFESSIONAL EXPERIENCE

Cloud Core Team Lead
SunIVY Solutions Myanmar Co., Ltd **May 2023 - Present**
Project : ATOM Myanmar Project Nokia CBIS 18 and CBIS 20

- Led cloud core operations for ATOM Myanmar Project (Nokia CBIS 18/20), OpenStack and CBIS platform operations for telecom cloud core infrastructure.
- Oversaw critical issue resolution, improving customer satisfaction and securing new projects and implemented proactive troubleshooting, reducing downtime by 30%.
- Applied security hardening for cloud workloads; collaborated with application teams to ensure stability. Guided junior engineers, fostering growth and team efficiency.
- Strong understanding of Infrastructure as Code principles with Terraform, currently applying knowledge to cloud-based automation projects.
- Experienced with Helm for managing Kubernetes deployments and streamlining application rollouts and experienced configuring NGINX as a reverse proxy and load balancer for web applications.

SunIVY Solutions Myanmar Co., Ltd
L3 Operation Engineer **July 2021 - May 2023**
L2 Operation Engineer **December 2019 - July 2021**

Project : Telenor Myanmar Project Contracted by Nokia - Nokia CBIS 17.5 and CBIS 18

- Managed OpenStack & Red Hat environments, ensuring 99.9% uptime and high availability.
- Implemented proactive monitoring and maintenance to ensure service reliability.
- Enhanced team collaboration and customer relationships.
- Applied security hardening techniques to protect cloud workloads.
- Performed VM upgrades and CBIS patching during maintenance windows to ensure stability and compliance.
- Maintained accurate hardware inventory and collaborated effectively with application teams.
- Supported CI/CD pipeline tasks and used Docker for containerization.

SunIVY Solutions Myanmar Co., Ltd
System Engineer **October 2018 - December 2019**
SunIVY Solutions Myanmar

- Implemented VMware environments and managed system upgrades during data center migration.
- Designed Palo Alto firewall configurations and ensured secure hybrid connectivity.
- Migrated DNS and Active Directory services with minimal user disruption.
- Provided technical guidance to junior engineers and support teams.

ICT STAR GROUP MYANMAR Company Limited (ISGM)
Junior System/Network Engineer **January 2018 - October 2018**

- Managed Windows systems, deployed VMware servers, and configured networks (LAN, Access Points).
- Provided technical support and troubleshooting.

Educational Background

B.E (Mechanical Precision & Automation)

University of Technology Yatanarpon Cyber City (UT-YCC) **Dec 2010 - Oct 2016**

Executive Diploma in Network and Server Infrastructure

Lincoln University **2019**

ADDITIONAL SKILLS & COMPETENCIES

Infrastructure Management

- Datacenter & Private Cloud
- Platform as a Service (PaaS)
- Server Administration
- Telecom Infrastructure
- Storage Management

System Administration

- Linux System Administration (RHEL, CentOS)
- Windows System Administration
- Active Directory, DHCP, DNS Server

Languages

- English (Fluent) | Burmese (Native) | Mandarin (Basic)

Leadership & Soft Skills

- Teamwork and Collaboration
- Developing Others
- Leadership & Mentoring
- Problem-Solving
- Team Management
- Customer Relationship Management
- Delivery Excellence
